EDUCATION

B.Tech — Computer Science & Engineering

2023 – 2027 (Expected)

The ICFAI University, Jaipur | CGPA: 8.78 / 10

Class XII — PCMB

2023

Jai Hind College, Mumbai | 56.17%

INTERNSHIP EXPERIENCE

Web Developer Intern (WordPress) — DevBox Technology, Jaipur

May 2025– Aug 2025

- Developed and customized responsive WordPress websites using themes, plugins, and page builders.
- Assisted in designing and maintaining website layouts, landing pages, and UI components.
- Collaborated with team members to fix bugs and improve user experience.
- Managed website content updates and troubleshooting tasks.

PROJECTS

Crop Recommendation System

Python

- Developed an AI/ML-based Crop Recommendation System using scikit-learn and Flask to predict suitable crops based on soil nutrients and environmental conditions.
- Implemented data preprocessing, feature scaling, label encoding, and trained a Random Forest model achieving approximately 99% prediction accuracy.
- Designed and deployed an interactive web application that recommends crops using parameters such as Nitrogen, Phosphorus, Potassium, temperature, humidity, pH, and rainfall.
- Performed model evaluation using classification reports, confusion matrix, cross-validation, and feature importance analysis to ensure model reliability and performance.

Terminal Based Portfolio

Python

- Developed a terminal-based portfolio application with an interactive command-line interface, enabling users to navigate projects, skills, and contact information through custom terminal commands.
- Designed and implemented the portfolio using programming concepts such as command parsing, dynamic content rendering, and responsive terminal styling to simulate a real developer console experience.

JUNE AI Assistant (Working)

Python

- Developed JUNE AI Assistant, a full-stack AI-powered assistant using FastAPI, Next.js, and Python, capable of handling multi-domain queries in Technology, Cricket, and Current Affairs.
 - Built a custom query understanding and domain detection engine with topic extraction, subdomain classification, style detection, and intelligent routing for user inputs.
 - Implemented a web research and knowledge extraction pipeline using Tavily API, including data cleaning, filtering, and fallback response generation for reliable AI responses.
 - Designed a modern real-time conversational chat interface with frontend-backend integration, chat history, loading states, and domain-aware fallback handling for uninterrupted user interaction.
-

TECHNICAL SKILLS & TOOLS

- | | |
|------------------------------|--|
| • Languages: C, Python | • Tools: Git, GitHub, VS Code |
| • Web: HTML, CSS, JavaScript | • Concepts: Data Structures, Algorithms, OOP, DBMS |
| • Database: MySQL | |
-

CERTIFICATIONS & ACHIEVEMENTS

- Completed NPTEL Course – The Joy of Computing using Python
 - Completed NPTEL Course – Indian Knowledge System
 - Completed NPTEL Course – Blockchain Technology
-

EXTRACURRICULARS & LEADERSHIP

- Secured 1st position in the 2023 college-level Smart India Hackathon as Team Leader.
- Secured 5th position in a college-level programming competition.
